## TILAK MAHARASHTRA VIDYAPEETH

Tilak Maharashtra Vidyapeeth was established in 1921, as per the directions of Mahatma Gandhi, as the educational memorial of Lokmanya Tilak, the great patriot and leader of freedom struggle since, its inception, the Vidyapeeth has focused on fulfillment of Lokmanya's dream of imparting National Education to equip the students to contribute productively towards the development of a strong and modern India.

The Vidyapeeth has constantly catered to the changing needs of the student community without compromising on quality as its prime focus. In recognition of its contribution in the fields of Sanskrit, Ayurveda, Social Sciences and Distance Education, the Government of India conferred the status of a 'Deemed to be University' on the Tilak Maharashtra Vidyapeeth in 1987, in accordance with the provision in the University Grants Commission Act, 1956.

In addition to the academic programs of Sanskrit, Ayurveda and Social Sciences the Vidyapeeth has also added to its credit various programs from the fields of Management, Engineering, Nursing, Physiotherapy, and Education and so on.

## INSTITUTE OF NURSING EDUCATION & RESEARCH:-

By keeping in consistency with the aims of the Vidyapeeth, professional degree course (B.Sc. Nursing) was launched from academic year 2009-10.

### Highlights:-

B.Sc. Nursing course is recognized by Indian Nursing Council, Maharashtra Nursing Council & Government of Maharashtra, affiliated to well multi specialty Hospitals, well equipped Infrastructure facilities, library with internet facility, online journal access, qualified and experienced teaching faculty, pleasing and conducive environment, personal attention, student career guidance and counseling cell, health club and recreational facilities.

## CONFERENCE THEME:

"Integrated Management of Neonatal & Childhood Illnesses."

In the last three decades the annual number of deaths among children less than 5 years has decreased by almost a third.

However, this reduction has not been evenly distributed throughout the world. Every year more than 10 million children die in the developing countries before they reach their fifth birthday.

Projections based on the 1996 analysis '*The Global Burden of Disease*' indicate that common childhood illnesses will continue to be major contributors to child deaths through the year 2020 unless significantly greater efforts are made to control them. This assumption makes a strong case for introducing new strategies to significantly reduce child mortality and improve child health and development.

### OBJECTIVES:

The objectives of the workshop are as follows:

1. To educate the nursing professionals regarding assessment, classification and management of illnesses in children less than five years.
2. To help in developing communication skills to counsel and guide the mothers.
3. To identify the scope of the program and its implementation at Community and Hospital level.
4. To discuss regarding N.S.S.K and routine immunization.

### KEY FEATURES:

Renowned professionals from the field of public health will guide the session.

### CONFERENCE TOPICS

1. Introduction to IMNCI.
2. Training overview in the state.
3. Objectives of "Integrated Management of Neonatal and childhood illnesses" program.
4. Methodology of assess and classify sick young infant from birth up to 2months.
